Career Objective

Motivated and hardworking beginner looking for an **SQA Internship** to start my career in Software Quality Assurance. I want to learn software testing, find bugs, write test cases, and improve my technical skills while working with an experienced team.

Education**Bachelor of Science in Computer Science (BSCS)**

ABC University, Karachi

2023 – 2027

CGPA: 3.2/4.0

Technical Skills

- Manual Software Testing
- Test Case Writing
- Bug Reporting
- Functional Testing
- Regression Testing
- Smoke Testing
- Basic SQL
- Basic API Testing
- Basic HTML & CSS
- MS Excel
- Jira (Basic)
- Postman (Basic)

Academic Projects**Online Shopping Website — Testing Project**

- Tested login, registration, search, and checkout features.
- Created basic test cases for different functionalities.
- Reported bugs with steps to reproduce them.
- Performed functional and regression testing.

Student Management System

- Tested student registration and record management features.
- Checked input fields and error messages.
- Identified issues and documented them in a simple bug report.

Internship / Experience**Fresher — No Professional Experience**

Currently looking for my first opportunity as an **SQA Intern** where I can apply my basic testing knowledge and gain practical experience.

Strengths

- Quick learner
- Good problem-solving skills
- Attention to detail

- Team player
- Responsible and punctual
- Willing to learn new technologies

Certifications

- Introduction to Software Testing — Online Course
